

**INDIA'S LEADING MANUFACTURER OF
FULLY AUTOMATED CONTINUOUS
PU/PIR & ROCKWOOL SANDWICH PANEL LINE**

An ISO 9001:2015 Certified Company

BISBEE TECHNOLOGY INDIA PRIVATE LIMITED

About Us

Bisbee Technology India Pvt Ltd is a pioneering manufacturing startup focused on producing high-quality continuous PU/PIR & Rockwool sandwich panels for India's rapidly growing cold chain, prefab construction, logistics, and industrial infrastructure sectors. By establishing a state-of-the-art continuous production line, Bisbee aims to revolutionize the Indian insulated panel market with products offering superior thermal performance, fire safety, and consistent quality.

Unlike traditional batch processes, Bisbee's automated continuous technology enables high-speed, large-scale production of panels with uniform core density and exceptional bonding strength — solving longstanding problems of inconsistent quality and limited supply. The startup's flexible manufacturing setup allows customization of panel thickness, lengths, surface finishes, and specialized fire-rated solutions, catering to diverse applications such as cold storage, cleanrooms, modular buildings, and warehouses.

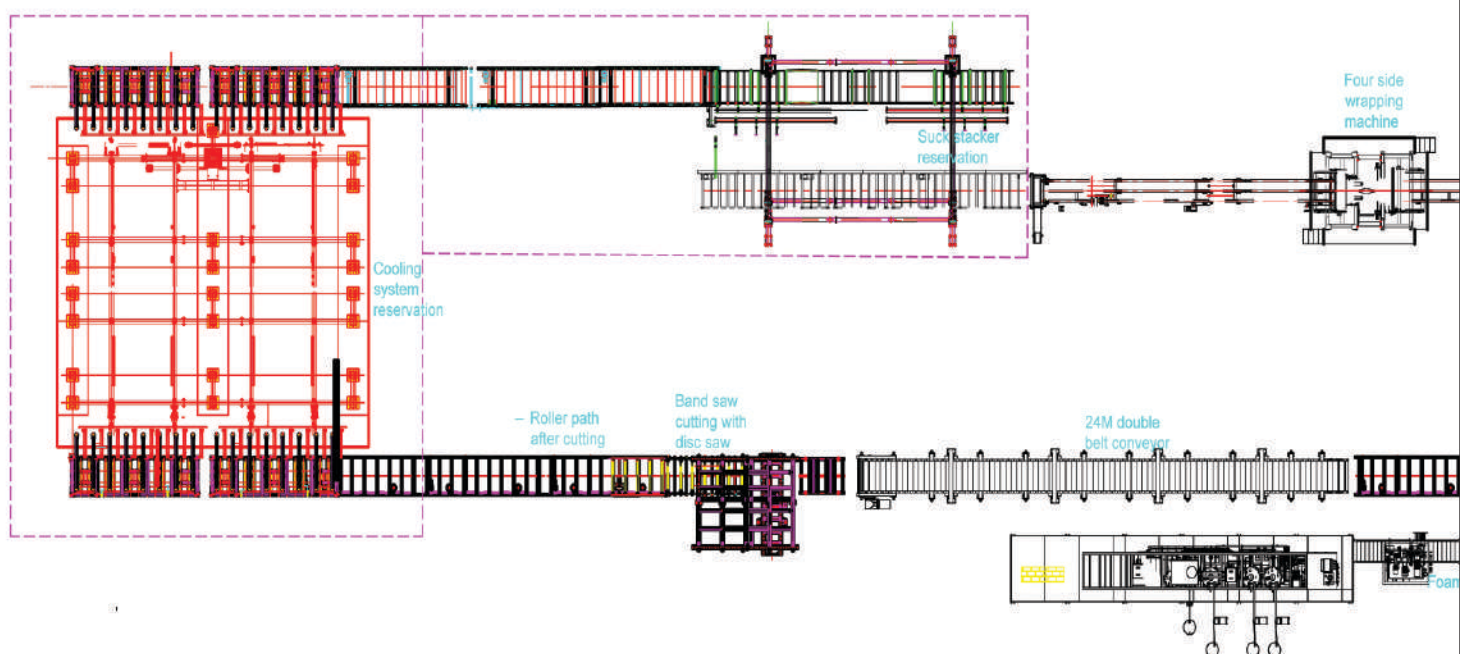

Vision

"To revolutionize India's insulated construction and cold chain infrastructure by becoming the leading manufacturer of world-class, energy-efficient, and customizable sandwich panels produced through advanced continuous technology."

Mission

To enhance energy efficiency and construction quality across India, Bisbee Technology India Pvt Ltd combines advanced manufacturing technology, customercentric solutions, and scalable capacity to meet the country's growing demand for modern, sustainable building materials.

Fully Automatic Continuous PU/PIR &

WHY SKYBEE INSULATED PANELS?

Better lifetime building performance is assured with Skybee's factory pre-engineered insulated panel systems. Skybee is also pleased to introduce a market-leading range of panels.

Durability

Lifetime performance

Exterior Metal Skin

Perfect weather barrier, corrosion protected and colour coated

Interior Metal Skin

Perfect vapour barrier, corrosion protected and colour coated

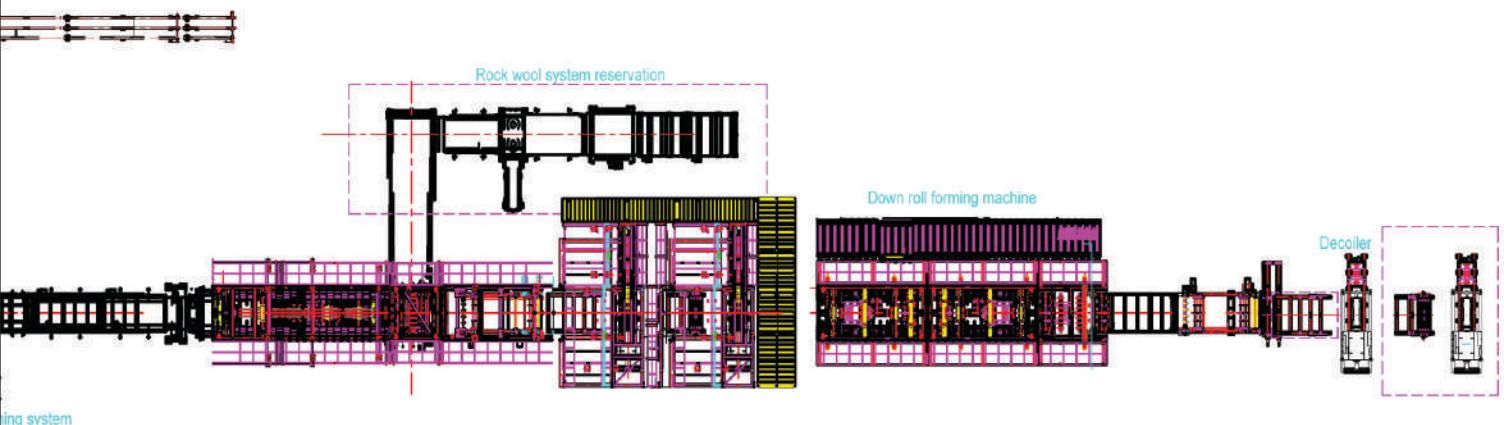

Airtight System

Guaranteed for the lifetime of the building

Coatings Superiority

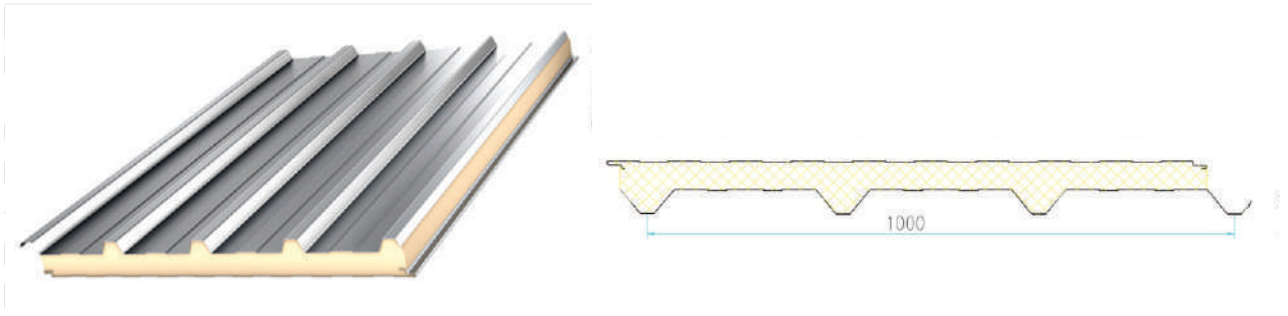

Selection of aesthetic profiles and colours offering a superior architectural appearance

Rockwool Panel Line

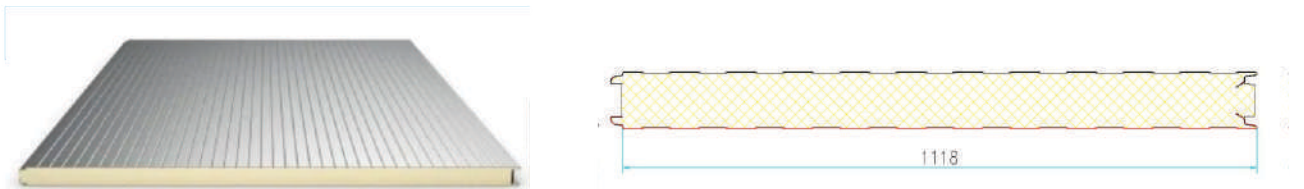

Panels Details

Insulated PUR/PIR Panel - Cold Room, Industrial Building, Architect Building

Infill Material :	PUR/PIR & Rockwool panel
Outer & Inner Skin Sheet	PPGI, PPGL, BGL, Stainless Steel, Aluminium, Craft Paper.
Thickness:	0.30mm TO 0.8mm
Effective Width:	1000mm
Overall Width :	1075mm
Length :	2 meters to 16 meters (also customized length available)
Thickness:	30, 50, 60, 80, 100, 120mm available

Infill Material :	Infill as PUR/PIR & Rockwool Panels with tongue and groove joints.
Density :	PUR $40 \pm 2\text{kg/m}^3$ and PIR $45 \pm 2\text{kg/m}^3$ (As per the requirement)
Outer & Inner Skin Sheet	PPGI, PPGL, BGL, Stainless Steel, Aluminium, Craft Paper.
Thickness:	0.30mm TO 0.8mm
Sheet Profile	Baby Rib, Plain
Length :	2 meters to 16 meters (also customized length available)
Covered Width :	1118 mm
Thickness:	50, 60, 80, 100, 120, 150, 200 mm available

Application of PU/PIR & Rockwool Panels

New Construction Projects

Cold Storage and Refrigeration Facilities

Agricultural Buildings

Cleanrooms and Laboratories

Porta Cabin

Dairy & Food Processing

- Cold Room / Storage
- Pre Engineered building
- Clean Rooms
- School/Collage
- Hospital & health care Centres
- Agriculture & Horticulture
- Defense
- Power Industries

- Warehouse
- Prefab Skybee-house
- Site Office
- Industrial enclosure & Control Rooms
- Aircraft Hangars
- Oil & Gas
- Meat Processing
- Commercial Building
